

BACK ROADS ENERGY

EXCEEDING GOALS & EXPECTATIONS

REDEFINING THE LAND SERVICE BUSINESS

A full-service land company, Back Roads Energy offers a variety of services that can be customized to fit the needs of our clients. Committed to providing a cost-effective, superior product using highly-qualified people, we prioritize creating a positive client experience from the first communication, to our delivery of a final product.

LEASING, MINERAL ACQUISITION & RIGHT OF WAY

Back Roads Energy has a very experienced, knowledgeable and personable crew. Whether we are negotiating a lease, ROW, or acquisition of mineral rights, our team always represents the highest standards of professionalism in the field. We pride ourselves on building honest relationships with the land/mineral owners, to assist them every step of the process.

Recognizing that every lease that is attained advances your drilling program, our buyers work hard to acquire signed leases while professionally educating and communicating with landowners.

Our experience in and knowledge of the field allow us to successfully negotiate and secure the necessary assets required to allow your operation to run smoothly.

TITLE SERVICES

- Abstracts - Coal, Surface, Oil & Gas, Real Estate, Certified
- Heirship/Genealogy
- Due Diligence

Our abstractors work diligently to provide up-to-date, accurate information in the timeframe stipulated by our clients. Realizing they are the first step in a multi-step process, our knowledgeable abstractors effectively gather and unify information from a variety of sources to provide the client the answers they need.

Back Roads Energy has the ability to perform thorough heirship searches using highly-qualified research professionals and high-quality resources. Using a variety of strategies, we provide the legal and complementary documentation necessary to address even the most complex heirship cases. We work diligently to provide prompt and precise results, recognizing the importance of timely research related to oil and gas interests.

When it comes to running title, regardless of the type, our goal is to work smarter for our client. Grouping together common back-chains and leaseholds has proven to save time and money on every abstract.

CURATIVE

As part of the Title process, we also have experience with curing any issues that arise as a result of the completion of a Certified Title Opinion.

We understand the additional forms and agreements that may be required, and our established working relationships with landowners help to create a seamless process as we go back and secure necessary agreements.

SURFACE OPERATIONS

Oil and gas operations can be complex, and Back Roads Energy realizes it takes more than securing a lease and pipeline right-of-way.

We have the experience to secure all rights needed for a seamless operation including, but not limited to, water lines, water withdrawals, tank farms, above ground water storage tank pads, temporary and permanent access, meter sites, pigging stations, valve sets, dehydration and compressors, pipe yards, boring locations, storage sites and construction yards.

COMMITTED TO THE REGION WE SERVE

Back Roads Energy is proud to use highly-skilled, local professionals creating a more efficient process that ultimately leads to a cost-effective solution to your project needs.

We are committed to the region we serve, prioritizing a local-approach to doing business.
