

BACK ROADS ENERGY

EXCEEDING GOALS & EXPECTATIONS

FULL SERVICE PROJECT MANAGEMENT

Whether utilizing our in-house services or our strategic partnerships, Back Roads Energy is able to competently manage and complete projects of any size or scope while exceeding our clients' needs and expectations. By serving as single point of contact for your project, we are able to help you work more efficiently.

SURVEY & MAPPING

An integral part of any project, Back Roads Energy is aware of the impact that the latest technology can have on the success of a project. As a result, Back Roads Energy is committed to offering the latest survey technologies that our clients need in the areas of residential, commercial and industrial development.

From the initial routing to the as-built at the completion of the project, we consistently remain focused on efficiency and accuracy.

In addition to the aforementioned, we can provide and/or oversee the following survey and mapping services:

- preliminary routing
- project closeout
- ALTA/ACSM surveys
- FEMA certificates
- hydrographic surveys
- construction stakeout
- control surveys
- topographic surveys
- boundary surveys
- As-builts
- site survey for land development
- minor/major subdivisions
- drone & UAV mapping

ENGINEERING

With the ability to design, supervise, maintain and complete an array of projects, Back Roads offers engineering services specific to your project needs. We understand the ways in which innovative engineering translates to the longevity of a successfully engineered project.

Our comprehension of the complexity of engineering allows us to efficiently manage your project utilizing our strategic partnerships. Through these partnerships, we are able to provide a number of services including, but not limited to:

- site design
 - storm water
 - erosion and sediment control
 - post-construction storm water control
 - reclamation design
- geotechnical analysis and design
- grading and earthwork analysis
- utility coordination and relocation
- municipal coordination

ENVIRONMENTAL PERMITTING

Recognizing that government regulations are ever-changing, Back Roads prioritizes staying in the know regarding related industry changes.

We are prepared to assist you as you navigate the intricacies of all projects, and the scrutiny that often ensues. Our services include, but are not limited to:

- stream and wetland delineation
- general permits for streams and wetlands
- erosion and sediment control permits
- major and minor modifications of permits
- national pollution discharge eliminations system (NPDES) permits
- cultural resources
- archaeological studies
- rare/threatened/endangered species studies
- environmental inspection

FORESTRY

Back Roads Energy has the ability to facilitate the forestry services often necessary in drilling and pipeline operations.

From providing appraisals, brokering a sale and clear cutting the land to begin your project, our experienced professionals are able to assist our clients through a variety of services.
