

BACK ROADS ENERGY

EXCEEDING GOALS & EXPECTATIONS

COMPREHENSIVE CONSTRUCTION SERVICES

Offering a streamlined approach to all aspects of your construction project, Back Roads Energy provides the assurance of a seamless operation from start to finish. By utilizing proficient project managers and established relationships with highly-qualified, skilled partners, we are proud to provide a turnkey construction solution.

SITE PREPARATION

Back Roads Energy is proud to offer the construction and maintenance services necessary for site preparation and maintenance. Back Roads has the ability to offer a variety of services utilizing trained professionals, providing peace of mind to our clients.

Our services can be adapted to fit the needs of the client based on the project at hand. Our site preparation services include, but are not limited to, the following:

- clearing and grubbing
- general excavating
- small to midsize pad construction
- access road construction
- site inspection and cleanup
- ongoing site maintenance

RESTORATION AND RECLAMATION

Back Roads Energy is equipped to handle all restoration and reclamation needs including the management of day-to-day inspections to ensure a finished product that meets and exceeds expectations.

Utilizing industry professionals with extensive knowledge related to reclamation and restoration, Back Roads Energy has the ability to assist clients as they remedy time-sensitive matters that require experience and know-how.

FORESTRY

Back Roads Energy has the ability to facilitate the forestry services often necessary in drilling and pipeline operations.

From providing appraisals, brokering a sale and clear cutting the land to begin your project, our experienced professionals are able to assist our clients through a variety of services.

EROSION AND SEDIMENT CONTROL

Back Roads Energy is able to assist our clients with successful erosion and sediment control installation and maintenance.

With an awareness of the microscope that construction projects are often under, we understand the necessity to do things the right way without cutting corners from day one.

With extensive knowledge related to environmental regulations, Back Roads Energy is able to offer safe, cost-effective, permissible solutions to your construction projects. We assist our clients as they navigate these local, state and federal mandates related to environmental agencies and the expectations we are required to uphold.

Our extensive list of capabilities include, but are not limited to, the following:

- silt fence
- dust control
- filter sock
- check dams
- seed and mulch
- hydro seeding
- concrete washouts
- wet ponds
- infiltration berms
- sediment traps
- diversion ditches
- rain gardens
- E&S vegetation
- slope interruption
